## EXPERIENCE

---

### Software Architect

Profile Software Services

Remote

2022 - Present

Software Architect focused on front-end architecture, scalable solution design and technical support for development teams in enterprise environments. Experienced in technical definition, best practices review, code quality, testing, continuous integration and functional/technical analysis for an enterprise client in the insurance sector. Role evolution: Front-End Architect → Software Architect → Functional Architect.

Used technologies: Angular, TypeScript, Ionic, JavaScript, HTML5, CSS3, Node.js, Python, Java, Docker, Kubernetes, OpenShift, Azure, Cypress, Jasmine, Karma, TOGAF, ARIS.

### Senior Full Stack Developer

PFS Group SL

Remote

2020 - 2022

Senior Full Stack Developer with experience in banking management platforms, email management systems and enterprise business tools. Worked across front-end, back-end and DevOps tasks, contributing to the development, maintenance and evolution of scalable internal applications.

Used technologies: Angular, TypeScript, HTML5, CSS3, JS (ES6+), Node.js, ExpressJS, Loopback, NestJS, MongoDB, MySQL, Oracle, TypeORM, Microservices, Microfrontends, Docker & Docker Compose, Jenkins, Git.

### Full Stack Developer

FIT Learning systems SL

Valencia

2018 - 2020

Full Stack Developer specialized in web and mobile platforms for the e-learning sector. Contributed to the development, maintenance and improvement of digital learning applications, working across both front-end and back-end layers.

Used technologies: Angular, TypeScript, Ionic, HTML5, CSS3, JS (ES6+), jQuery, Bootstrap, MySQL, PostgreSQL, PHP, Git.

### Full Stack Developer

Social Network Technology SL

Valencia

2017 - 2018

Full Stack Developer working on multiple web projects for a digital design agency. Focused on building responsive websites, implementing front-end interfaces, integrating REST APIs and improving SEO-oriented web solutions.

Used technologies: HTML5, CSS3, JavaScript, jQuery, Bootstrap, MySQL, PostgreSQL, PHP, Git.
